

PROFESSIONAL SUMMARY

Linux Systems Administrator with 3 years of hands-on experience managing production Linux servers, web hosting environments, enterprise networks, and end-user IT environments. Experienced across CentOS, RHEL, Rocky Linux, AlmaLinux, and Ubuntu, with practical administration of WHM/cPanel, SolusVM, VPS environments, DNS and mail servers, firewalls, and network services. Skilled in Ansible, Python, Git, cron-based task scheduling, Zabbix monitoring, Active Directory, NFS, VLAN, Apache, Nginx, Iptables, and Pfsense. Brings hands-on exposure to vulnerability assessment and Linux-based security tooling including Nmap, Wireshark, and Burp Suite, with experience translating security findings into remediation recommendations and server/network configuration fixes. Focused on system uptime, performance monitoring, network reliability, security-aware administration, and dependable infrastructure support.

CORE SKILLS

- **Linux Administration:** CentOS, RHEL, Rocky Linux, AlmaLinux, Ubuntu, SELinux, LVM, ACLs, Permissions
- **Automation & Scripting:** Ansible, Python, Git, Cron Jobs, Task Scheduling
- **Hosting & Virtualization:** WHM, cPanel, WHMCS, SolusVM, VPS Management, Cloud Computing
- **Networking & Services:** DNS, DHCP, NFS, VLAN, Apache, Nginx, Iptables, Pfsense, LAN/WAN Troubleshooting
- **Monitoring & Security:** Zabbix, Active Directory, Vulnerability Assessment, Nmap, Wireshark, Burp Suite

PROFESSIONAL EXPERIENCE

Ruchi Security Printers Pvt. Ltd.
Network Engineer

Bhopal, MP
Sep 2025 – Present

- **IT Infrastructure Management:** Manage and maintain IT infrastructure end-to-end, supporting stable network connectivity and reliable Linux and Windows server operations.
- **LAN/WAN Administration:** Configure and troubleshoot LAN/WAN networks, resolving connectivity issues and supporting reliable communication between systems.
- **Windows Server Administration:** Administer Windows Server environments, including Active Directory management and ongoing server uptime maintenance.
- **Desktop and Application Support:** Support desktop systems and internal applications while maintaining their integration with the core network infrastructure.
- **Infrastructure Reliability:** Troubleshoot infrastructure issues across network, server, desktop, and internal application environments to maintain dependable IT operations.

Vellko Media
Penetration Tester

Bhopal, MP
Dec 2024 – Mar 2025

- **Vulnerability Assessment:** Performed vulnerability assessments across Linux-based web and network platforms to identify security weaknesses.
- **Linux Security Exposure:** Applied practical security assessment experience to strengthen understanding of Linux administration and server hardening.
- **Security Reporting:** Authored security reports documenting assessment findings and associated remediation recommendations.
- **Remediation Guidance:** Translated identified vulnerabilities and findings into concrete server and network configuration fixes.
- **Network Configuration Security:** Supported security-focused review of Linux web and network environments with attention to configuration and hardening requirements.

Vellko Media
Linux System Administrator (Jr.)

Bhopal, MP
Aug 2024 – Mar 2025

- **Linux Server Administration:** Managed Linux servers in a live hosting production environment and supported day-to-day server operations.
- **Network Troubleshooting:** Resolved network issues affecting hosting environments to support stable and reliable service operations.
- **WHM/cPanel Administration:** Administered WHM and cPanel for client hosting accounts and provided technical support for hosting-related incidents.
- **DNS, Mail and Firewall Management:** Managed DNS and mail servers, configured firewalls, and applied network security best practices.
- **Monitoring and Support:** Monitored server performance and handled customer-facing support operations to maintain uptime and reliability.

Magnum Group
Desktop Support Engineer

Bhopal, MP
Jun 2023 – Jul 2024

- **End-User IT Support:** Maintained a stable IT environment for end users and addressed day-to-day technical support requirements.
- **Software Installation:** Performed software installations and supported required application setup for end-user systems.
- **System Updates:** Managed system updates and routine maintenance activities to support reliable endpoint operation.
- **System Optimization:** Performed system optimization and troubleshooting to maintain dependable workstation performance.
- **Endpoint Security:** Implemented endpoint security practices to help safeguard organizational data and IT resources.

EDUCATION

Sam Global College
Bachelor of Commerce (B.Com)

Bhopal, Madhya Pradesh
2022 – 2024

Jetking
Diploma in Cloud Computing (Information Technology)

Bhopal, Madhya Pradesh
Feb 2022 – Mar 2023

- **Practical Training:** Completed lab-based training in Linux administration, networking, cloud infrastructure, virtualization, server management, and cybersecurity fundamentals.

CERTIFICATIONS

- **Certified Ethical Hacker:** CEH v13 – Simplilearn, May 2026
- **Diploma in Cloud Computing:** Jetking, Mar 2023
